

User testing

Step 3: Second Usability Test

User Feedback: Explain here in detail

1. Add more details to my drawings
2. Need titles and headings to make it clear to the user
3. All in all make it more understandable, add more to all three pictures

Proposed Changes as a result of feedback

1. For my drawings, I'm going to add details by adding words, pictures, and actual items you would see on the page

2. I will add titles and headings for each page and or picture so the user knows what they are looking at
3. I will add color to make my pages look more realistic

Step 4: Revision

Explanation of changes made

1. For my drawings, I added details by adding words, pictures, and actual items you would see on the page. For example I wrote out actual pictures and items you would see on the pages.
2. I also added headers and titles so it's clear to the user how to proceed to the next page.
3. I added lots of color, which makes it easier for the user to follow the pages easier.
